

We claim:

1. A brush with a multi-colored brush handle comprising:
 - (a) a tuft of bristles;
 - (b) a ferrule attached to the tuft of bristles; and
 - (c) a transparent brush handle attached to the ferrule; and
 - (d) at least one chamber contained within the transparent brush handle that substantially extends through a length of the brush handle, the chamber containing a colored material that is visible through the transparent brush handle.
2. The brush according to claim 1, wherein at least one chamber comprises a plurality of vertical chambers, each having a separate axis.
3. The brush according to claim 1, wherein the chamber has a plurality of segments contained therein, each segment extending a full length of the chamber.
4. The brush according to claim 1, wherein the colored material comprises a colored epoxy resin.
5. The brush according to claim 1, wherein the colored material comprises a colored rod inserted into the chamber.
6. The brush according to claim 1, wherein the chamber has a helical contour.
7. The brush according to claim 1, wherein the chamber has a cylindrical geometrical cross-sectional area.

8. A transparent brush handle comprising a plurality of chambers contained within the transparent brush handle that substantially extend through a vertical length of the brush handle, each of the chambers containing a colored material that is visible through the transparent brush handle.

9. The transparent brush handle according to claim 8, wherein each of the chambers is cylindrical and has a separate axis.

10. The transparent brush handle according to claim 8, wherein the chambers comprise segments within a single cylindrical passage, each segment extending the length of the passage.

11. The transparent brush handle according to claim 8, wherein each of the chambers comprises a pie-shaped member having two straight sides in common with adjacent ones of the chambers and a curved side that joins the other chambers to form a cylinder.

12. The transparent brush handle according to claim 8, wherein the colored material comprises a colored epoxy resin.

13. The transparent brush handle according to claim 8, wherein the colored material comprises a colored rod inserted into the chamber.

14. The transparent brush handle according to claim 8, wherein the chamber has a cylindrical geometrical cross-sectional area.

15. The transparent brush handle according to claim 8, wherein the transparent brush handle comprises a solid handle constructed from polystyrene.

16. The transparent brush handle according to claim 8, wherein the transparent brush handle comprises a hollow brush handle.

17. A transparent brush handle comprising a chamber contained within the transparent brush handle that substantially extends through a vertical length of the brush handle, the chamber being vertically partitioned into at least two segments with each segment containing a different colored material that is visible through the transparent brush handle.

18. A transparent brush handle according to claim 17, wherein the colored material comprises a colored epoxy resin.

19. A transparent brush handle according to claim 17, wherein the chamber has a helical contour.
